Wiener Börse – Wiener Börse Live

Wiener Börse Enhances Finance Portal

Wiener Börse With High-End Web Site

While many stock exchanges are facing the demand for online stock price information and increased online traffic at their financial websites, the Austrian exchange Wiener Börse has been proactive in meeting these challenges.

To reinforce its position, continue to set a standard for finance portals in Austria, and help to strengthen the Austrian capital market as a larger goal, Wiener Börse selected Interactive DataSM to help revamp the exchange's finance portal. The core of the new online offering is Wiener Börse Live, a real-time financial information system that offers real-time quotes for a monthly fee. This offering includes streaming market data as an alternative to a request/response quote service that the exchange had already been providing.

Interactive Data and salesXp, the company's sales and implementation partner for Austria, Central and Eastern Europe, helped to develop the concept and manage the Wiener Börse web site implementation. To provide the finance portal with market data information, Interactive Data collects quotes from the exchange, merges the information with reference data on the Market Data Gateway market data platform, and then displays it on the web site. A special entitlement system is designed to ensure that registered users can view only the content available to their level of permission. To customize the offering for private investors, the implementation team focused efforts on making it easy to navigate through the site.

Commenting on Wiener Börse Live Dr. Ludwig Nießen, head of the department of information technology at the exchange, said: "The cooperation between Interactive Data and Wiener Börse AG has worked out perfectly. The required solution, Wiener Börse Live, was implemented to our fullest satisfaction concerning technology and functionality. Wiener Börse Live handles over 14 million page impressions and 0.6 terrabyte data volume without time loss to private investors."

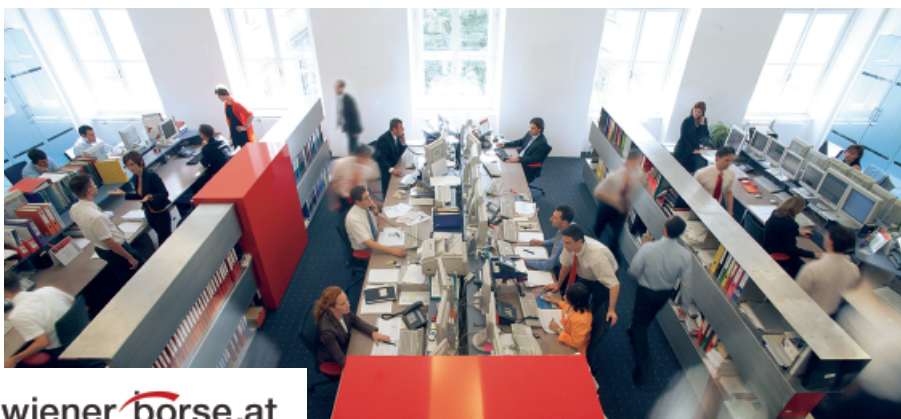

Wiener Börse Live provides stock quotes and information on indices, ETFs, funds and derivatives, as well as options and futures. The site also provides additional

Benefits of this web-based solution:

- High speed due to broad bandwidth
- Individual and user-related display of market data
- Appealing design and user-friendly navigation
- Efficient permissioning of registered users with entitlement system

Better tools for premium information

Wiener Börse's new market data web site includes a large number of additional features that can also be used in Wiener Börse Live. A chart analysis tool, tops and flops for each market or branch with graphic display, a 3D warrant analyzer with several possible investment scenarios and a currency calculator with up-to-date prices are all part of the toolbox. A significant advantage for users can be personalized watchlists and portfolios that can be created in unlimited numbers. Specialized tools reserved for users of Wiener Börse Live include daily tick data for certain periods and instruments and a market status qualifier showing trading phases of the cash market according to the market model.
