Contribution Suite

Multi-contribution system for streaming data

Globally, financial institutions, data vendors and online portals rely on data covering Forex, OTCs, derivatives, funds, grey market instruments, etc for internal operations and external communication. Issuers of such instruments need to offer reliable ways to publish up-to-date information.

Interactive Data Managed Solutions provides Contribution Suite, a multi-contribution system for streaming data. It allows issuers to efficiently disseminate data while retaining full control over the recipients, formats and billing of content.

■ Feed Enhancements

Incoming data (i.e. feeds, ftp files, XML) can be imported automatically into Contribution Suite, processed into standardised formats and exported in various vendor protocols.

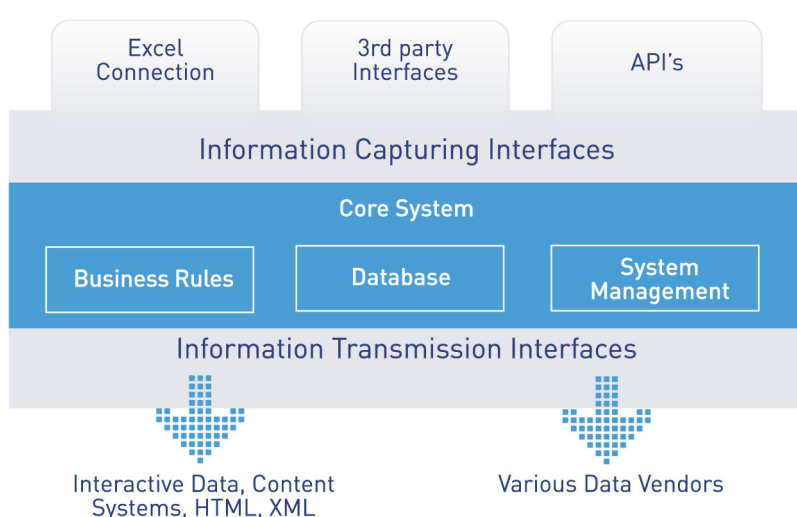

Contribution Suite can help to:

- Aggregate and consolidate data from various sources into a standardised feed format.

- Enhance pages and quote lists by integrating selected data
- Chain feed data for continuous updates
- automatically update distributed data items within pages, records or chains
- Simultaneously transmit data to several recipients via parallel lines

■ Full Distribution Control

Using Contribution Suite, data can be exported to Interactive Data Managed Solutions' market data platform (Market Data Gateway) and various other systems. These include Internet, intranet and extranet solutions as well as exchanges and software applications. Recipient needs can be addressed by the setting of performance rates in addition to content and output.

Input

Contribution Suite

Output

Contribution Suite from Interactive Data Managed Solutions is the multi contribution system to distribute financial data

■ Optimize Communication Infrastructures

Contribution Suite can help to meet customers needs more effectively by standardising communication processes to increase efficiency, improve distribution and enhance speed. Contribution Suite's standard interfaces and included support tools substantially reduce time and effort to administrate communication and contents as various vendor formats are standardized into one format that can be accessed via multiple interfaces.

■ Benefits

- Run your own market data feed distribution and deliver vendors and recipients with targeted data streams.
- Determine the volume, update rate, format and recipients of your distributed data.
- Distribution of up to 6,000 ticks per second of quote data with a powerful scalable system.
- Provide market data feeds to major inter-bank vendors.
- Deliver data to Internet, intranet or extranet solutions in HTML, XML or customised formats.
- Target more than 150 renowned financial service providers from Interactive Data Managed Solutions' customer.

About Interactive Data

Interactive Data Corporation (NYSE: IDC) is a leading global provider of financial market data, analytics and related solutions to financial institutions, active traders and individual investors. Interactive Data, headquartered in Bedford, Mass., has approximately 2,400 employees in offices located throughout North America, Europe, Asia and Australia.

Interactive Data's Managed Solutions business is a leading provider and operator of customized financial information systems. The group builds and manages Web-based financial market data portals and terminals for a range of organizations worldwide, from retail and investment banks to asset managers, online brokers, stock exchanges and media portals. By aggregating a broad set of financial data and client-proprietary content and offering visually stunning features such as charts, sophisticated search functions, decision-support tools and analytics, these intuitive applications can help customers optimize their business processes and realize efficiencies. This group is managed as part of the Interactive Data's Real-Time Services business, which provides a comprehensive suite of offerings that includes PlusFeed(SM), a consolidated, low-latency digital datafeed.
